CHORDETTE FOR EDUCATION

Chordette for Education is a ukulele chord library program created specifically for schools and individual instructors. It can be used for creating song sheets, presentations, or adding chords to videos. This education version has a basic chord set for beginners, featuring finger numbering, alternate chords, and 3D chords. It also is available in color for Macintosh to support Aquila Kids strings.

INSTALLATION for macOS

Chordette for Education for macOS is distributed as a dmg file named Chordette-Uke-Education-Mac (Chordette-Uke-Ed-Color-Mac for the color version). The dmg file contains the following components: Double click the dmg file. Chordette for

Education for requires three custom chord fonts, which are included with the application. It is important to install the fonts before opening the Chordette for Education app, or else you will just see alphanumeric characters displayed rather than the chords. On your main drive, open the Library folder, and then open the fonts folder. Copy and Paste the fonts into the Fonts folder. It is recommended that you retain the dmg file as a backup.

The Chordette for Education app can be located anywhere you choose. It does not need to be in the Applications folder.

USING CHORDETTE for EDUCATION

The easy way to enter chords is to use the Copy Chord button.

COPY CHORD BUTTON

When entering chords using the Copy Chord button, place your cursor where you want the chord to be inserted. After clicking on the Copy Chord button, either select paste from your app menu, or use your computer keyboard shortcut. You may need to resize the chord for your formatting preference.

KEYBOARD CHORD ENTRY

1. Open a word processing app.
2. Select the font in the word processing app that relates to the desired chord. The font will be displayed under the Font label in the Chordette for Education app.

NOTE: Some versions of word processors display the chord name in the style of the font. This will result in the font names being shown as a string of chords. You may not be able to disable this feature. If so, look for a menu item that provides an alternative view for fonts. For Example, Pages for Macintosh displays the fonts in the Format sidebar as the style of the font, but has a Show Fonts menu under the Format menu at the top of the Mac screen that displays the fonts by name.

3. Select the desired font size in the word processing app.
4. Place the cursor in the word processor app where you want to insert the chord. Type the keystroke that is displayed in the Chordette for Education app for the desired chord. For example, "A" will enter an A chord for Group A chords. Typing "Q" will enter a Cmaj7 chord.
